Current Project

FILEX Student Management System

(since 2019)

FILEX (Formacion Integral por Lenguas Extranjeras) is a language program offered in the campus Centro Universitario del Sur, which is a part of the Universidad de Guadalajara's regional campus network in Mexico. Right now I am maintaining a FullStack platform (React + GraphQL + SQL) for the technological needs of the language program.

Backend

NodeJS server that unifies all the information from the platforms in a GraphQL API.

[Code on Github](#)

Apollo GraphQL Server

Postgresql Database

Frontend

React Clients (whit an Apollo GraphQL client) for different specific needs.

Placement Test:

Registration:

Workshops:

A platform where aspiring students complete an auto-graded multiple choice placement test and be redirected to a videocall where teachers from the program apply an oral exam.

[Code on Github](#)

A platform where aspiring students register every semester to an offered course in the program.

[Code on Github](#)

Every semester, language workshops are offered for students. This platform helps students make reservations for the different workshops.
